

HEIRONIMUS & BRUGH'S,

206 Commerce Street.

Ready for the Summer Season.

The winter of our great discontent seems to have gone the way of its predecessors, and the glorious summer's sun is now upon us. The preparation you have delayed to place you in sympathy with the new order of things will now have to be made with a rush. As providers in this line, we believe that we are justified in calling your attention to the vast array of

Hot Weather Fabrics

Now being exhibited by us, and asserting that for small margins of profits asked, endless variety of materials, perfect printings, exquisite colorings and comprehensive assortments, there is no such stock of correct stuffs this side of large Northern cities. The prices are the closest named by the closest city retailers for like qualities.

Remember, price is no indication that goods are cheap. Without intrinsic worth, price should be no object to economical shoppers. There have always been unscrupulous dry goods merchants, who will make all sorts of misrepresentations in offering their stuffs, and we presume there always will be.

What we claim is to offer you only reliable makes of goods (which at all times cost a little more than imitations) at the lowest possible margin of profit, and, regardless of claims made by others, we will at all times sell equal values at as low prices as offered by any legitimate competitor.

We cordially invite the ladies from every section to visit our establishment when out shopping.

The Convenience of the Gas Cooking Stove.

Without exception, no doubt, every housewife has experienced many inconveniences necessarily connected with the coal cooking stove. The kindling must be provided and coal brought from the cellar. After the fire is started it may not burn, and from a half to one hour is required to heat the stove before the meal can be started. With a gas stove it is the reverse. No preparation is needed. When the food is ready for the stove the gas is lighted and the heat is applied at once. Call at our office and see sample stoves, which are sold at cost. The cost of operation averaged last year in Roanoke per family per month \$2.35. ROANOKE GAS AND WATER COMPANY.
